PROFESSIONAL SUMMARY

Full Stack JavaScript Engineer and Technical Lead with 5+ years building production web and mobile applications across fintech, e-commerce, healthcare, banking, and tourism. Specialised in the JavaScript/TypeScript ecosystem, end-to-end React, React Native, and Next.js on the front, Node.js and serverless APIs on the back, with a track record of owning the full product lifecycle from architecture through deployment and support, including apps published to the Google Play Store and systems serving real users.

Experienced in leading platform development and engineering teams while remaining hands-on in code, with a track record of delivering across fintech, e-commerce, healthcare, and beyond. Experienced in integrating payment gateways (Paystack), real-time systems (Pusher), authentication (NextAuth), and relational databases (PostgreSQL) via modern ORMs (Drizzle, Prisma). Focused on shipping scalable, user-centred products and mentoring the next generation of developers.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS

Frontend: React, React Native, Next.js, Redux, Context API, Responsive Design

Backend & APIs: Node.js, RESTful API design & integration, NextAuth, webhooks, payment gateway integration

Databases & ORMs: PostgreSQL, MySQL, Drizzle ORM, Prisma, Firebase, Supabase

Real-time & Services: Pusher, Expo, Paystack

Tooling & Deployment: Git, Vercel, Expo EAS, Google Play Store, Postman, Vite, Figma, VS Code

Practices: Agile/Scrum, State Management, User-Centered Design, Code Review

Additional: PHP, Python, Laravel, Electron, SQLite, WordPress

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer | Techieszon | Accra, Ghana

November 2021 – Present

- Collaborate with cross-functional teams, including designers, backend engineers, and product managers, to design and develop responsive web and mobile applications that improve user experience and drive business growth.
- Implement user-centered design principles to enhance the accessibility, usability, and aesthetics of products, ensuring a consistent user experience across web and mobile platforms.
- Develop and maintain multiple production applications using React, React Native, TypeScript, and modern state management solutions, including Redux and Context API.
- Integrate RESTful APIs, payment gateways, and third-party services, including Firebase and Supabase, to deliver full-featured applications across fintech, e-commerce, and media sectors.

Head of Business and Project Lead | Gilkup Technologies | Accra, Ghana

May 2025 – May 2026

- Led the development and execution of Express ZipZoom and other tech platforms, overseeing the full product development lifecycle including planning, development, testing, deployment, and ongoing support.
- Established and implemented agile project management practices across teams, introducing sprint planning, daily standups, retrospectives, and iterative development methodologies.
- Recruited, trained, and supervised interns on technology projects, developing comprehensive onboarding programs and mentoring junior developers on best practices and coding standards.
- Ensured platform security, scalability, and performance met enterprise standards through code reviews, performance optimization, and implementation of industry best practices.
- Collaborated with senior management to align technical solutions with business goals, driving innovation in AI, VAS, e-commerce, and digital services aligned with the company's strategic focus areas.

Full Stack Developer | Ads Media Agency | Accra, Ghana

January 2021 – December 2023

- Designed and developed responsive and user-friendly websites for diverse clients across various industries, ensuring mobile-first design and cross-browser compatibility.
- Designed and developed user interface components for distributed applications, creating reusable component libraries that streamlined development workflows and ensured consistent design patterns.

Junior Software Engineer | Stanbic Bank Ghana | Accra, Ghana

November 2020 – July 2021

- Collaborated with an agile team to build automated email systems for critical banking operations, including Account Opening, Statement Request, Cross-Border Payment, Customer Feedback, KYC, PEP screening, and regulatory compliance reporting.
- Developed responsive email templates, including AitelTigo Statement, Branch Monitoring, DUD Cheque, Sybrin, Swift, TTUM Report, Remittances, and TIN Dispensation systems, ensuring cross-client compatibility and compliance with banking standards.

KEY PROJECTS

InvoiceFlow – Multi-Tenant SaaS Invoicing & Business Finance Platform

- Designed and developed a full-featured, subscription-based SaaS platform for freelancers and small businesses to manage their complete billing workflow, supporting multi-organization workspaces with role-based access control, team invitations, and audit logging across all financial operations.
- Built core finance modules, including invoice generation with e-signature support and public client portals, receipt management, estimate-to-invoice conversion with deposit billing, recurring invoice scheduling, expense tracking with receipt uploads, time tracking with direct invoice conversion, and client account statements with PDF export.
- Implemented real-time notifications via Pusher, multi-currency support, customizable tax configurations, discount management, payment gateway integration for online payment collection, WhatsApp and email delivery for invoices and receipts, and a public REST API with API key management and webhook support for third-party integrations.
- Engineered a subscription billing system with plan-based feature gating (Free, Pro, Business tiers), usage metering, billing history, and a referral program, alongside an admin dashboard for platform-wide organization management, testimonials, and contact oversight.

- **Technologies:** Next.js, TypeScript, PostgreSQL (Neon), Drizzle ORM, NextAuth, Pusher, Vercel, PDF generation, Paystack, RESTful API

PharmaFast – Pharmacy Delivery Platform (Web & Mobile) V2

- Designed and developed a full-stack pharmacy delivery platform connecting customers with pharmacies across Ghana, enabling online browsing, prescription uploads, and doorstep drug delivery with real-time order tracking.
- Built a cross-platform mobile application with biometric authentication, Google and Apple social login, multi-pharmacy cart management, and automated order splitting across pharmacies, alongside a web-based admin dashboard for managing orders, deliveries, riders, and analytics.
- Integrated Paystack payment gateway, real-time push notifications via Pusher and Expo, and live rider tracking, with OTA update support deployed through EAS and the Google Play Store.
- **Technologies:** React Native, Next.js, TypeScript, Redux, Prisma ORM, PostgreSQL, Paystack, Pusher, Expo EAS, Vercel deployment

Multi-Industry Point of Sale & Business Management System

- Designed and developed a full-featured offline-first desktop POS and business management system supporting multiple industry types including hardware retail, car rental, salon, pharmacy, restaurant, supermarket, and more, with industry-intelligent forms that automatically adapt to show only relevant fields per business type.
- Built core business modules including inventory management, sales processing, shift management, quotations and delivery notes, expense tracking, credit ledger, layaway, loyalty rewards, staff commissions, and a complete rental workflow with deposit tracking, add-on services, overdue detection, and payment settlement at return.
- Implemented a migration-based SQLite schema system with automatic safety-net repairs on startup, ensuring data integrity and seamless upgrades across production deployments.
- **Technologies:** Electron, React, JavaScript, SQLite (better-sqlite3), Ant Design, Zustand, Vite

Discovery Platform | In Development

- Building a comprehensive tourism platform to help people discover Ghana through curated content on tourism destinations, local cuisine, cultural events, and car rental services.
- **Technologies:** React, TypeScript, Redux, RESTful API integration

REFCON Ecommerce Platform | In Development

- Developing a full-featured e-commerce platform to help businesses establish and grow their online presence with integrated payment processing and inventory management.
- **Technologies:** React, TypeScript, Redux, Laravel API (built and consumed), RESTful API integration

Finance Security Group Limited

- Developed a fintech platform bridging global capital with African enterprise through strategic investments and innovative financing solutions.
- **Technologies:** React, TypeScript, Redux, RESTful API integration

REFCON Consult Website

- Built a professional website for a consulting firm specializing in integrated accounting and IT solutions, deployed on Vercel for optimal performance and reliability.
- **Technologies:** React, TypeScript, Redux, Supabase, Vercel deployment

Paradise Media Hub

- Developed a digital library platform for Christian resources, including sermons, theme songs, devotionals, and Bible study materials, with search and categorization features.
- **Technologies:** React, TypeScript, Redux, Supabase, Vercel deployment

PharmaFast Ghana Mobile App V1

- Designed and developed a mobile application connecting users with pharmacies for contraceptive sales and delivery, published on the Google Play Store.
- **Technologies:** React Native, JavaScript, Firebase, Google Play Store deployment

Rentsimconnect Platform (Web & Mobile)

- Built frontend architecture for both web and mobile applications, providing easy and fast connection services to travelers arriving in Ghana, including accommodation booking and local services.
- Integrated payment gateways and RESTful APIs, implementing Context API for efficient state management across the application.
- **Technologies:** React, React Native, JavaScript, Context API, RESTful API integration, Payment gateway integration

Invoice Management System

- Developed a web application for generating and sending professional invoices with customizable templates and automated email delivery.
- **Technologies:** React, JavaScript, PHP, Vercel deployment

QR Code Generation Platform

- Built a user-friendly web application for generating customizable QR codes with various styling options and download formats.
- **Technologies:** React, JavaScript, Firebase, Vercel deployment

Bulk SMS Portal

- Created a web platform for sending bulk SMS messages with contact management, message scheduling, and delivery tracking capabilities.
- **Technologies:** React, JavaScript, Vercel deployment

Personalized Financial Education System

- Designed user interface for a financial literacy platform focused on delivering personalized educational content to users.

EDUCATION

BTECH, Information Communication Technology (Software Engineering) – Ho Technical University – Ghana | Sep 2020 – July 2022

Relevant Courses: Cloud Computing, Operating Systems, System Design, Data Structures, Mobile App Development.

HND, Information Communication Technology (Software Engineering) – Ho Technical University – Ghana | Sep 2018 – May 2021

Relevant Courses: Object-Oriented Programming, UX/UI, Cloud Computing, Systems Analysis, DSA, Communication skills

LEADERSHIP & VOLUNTEERING

- **Lead For Ghana Associate** – Served as ICT teacher at Presbyterian Senior High School, Teshie, developing and delivering a comprehensive ICT curriculum to high school students.
- **Digital Skills Facilitator** – Institute of ICT Professionals (IIPGH), training professionals in modern web development practices and digital literacy.
- **Co-Organizer** – Oracle Academy Student Bootcamp Ghana, coordinating technical workshops and mentoring student developers.
- **Research Contributor** – Researched implementing Peer-to-Peer Energy Trading in Community Microgrid Distribution Systems for Ghana's energy sector.
